

Bay Area Vital Link, Inc.
6529 Telegraph Ave.
Oakland, CA 94609
(510) 338-3466
(877) 801-2513 (Response Center)

The Vital Link system with the Fall Detection pendant is intended to provide an extra level of protection using BioSensics ActivePERS technology. But please be aware that the Fall Detection pendant does not detect falls with perfect accuracy or precision.

You understand and agree that the Fall Detection pendant is designed to detect falls based on the user's movement, momentum, and angle and therefore cannot detect every fall (for instance, if the user is gradually or slowly sliding down and/or without changing angle, especially from a sitting position, such as a wheel chair.)

You understand and agree not to alter or change the necklace-cord included with the pendant. The pendant is designed to function with a cord of a specific length.

Since the Fall Detection pendant does not detect all falls, the user should always try to push the button if the user needs help.

You also understand that the Fall Detection pendant is an in-home (that is, stationary) system and will not detect falls outside the user's home even if the Fall Detection pendant is bundled with a GPS Mobile System.

If you need help, you should always push the help button on your wearable device or base unit.

I have read and agree to the terms above.
